A Common Collaboration and Learning Environment
ITPB Discussion: 2/13/06

1. What benefits would accrue to faculty and students if UCLA can converge on “an integrated environment as an institution-wide service”?

2. As part of its recommendation, the FCET included a list of goals and principles that were deemed critical in selecting a solution. What goals and principles does the ITPB think are critical to such a service?

3. What are the ITPB concerns about a common solution? How can these concerns be reframed as criteria to be used in the review process and then later in the definition of service, governance, and funding processes?
