

Business Model: Who pays for what?

1. Researchers
 - Nodes
 - Storage
2. Recurring recharges
 - Minimized as much as possible but needed for stand alone systems
3. Campus
 - environmentals
 - System Admin
 - Networking
 - Occasional seed contributions for nodes
4. State
 - Regional data centers
 - General purpose nodes
5. Donors/Industry
 - Strategic fund raising campaigns

Recommendations:

1. Continue to pursue the shared cluster model.
2. Continue to be active and leading participants in the UC regional data center model.
3. Continue to be active and leading participants in the UC grid portal development.
4. Continue to explore business models.
5. Begin to investigate cloud computing.
