

Questions for ITPB Breakout Sessions

Wednesday, March 11, 2009

A. IT Investment Strategy

We have a vision statement that says that we want to be recognized as an institution that is an innovator and leader in applying IT to advance its academic mission

1. What do innovator and leader in applying IT to advance our academic mission mean to you?
2. What do you consider to be the primary parameters or processes that should be in play to direct IT investments (both institutionally and locally) to achieve this vision?
3. What are some example investments that would illustrate this kind of innovation and leadership? In general, how do we identify these?

B. IT Investment Strategy

We have a vision statement that says that we want UCLA faculty, students and staff to be digital citizens with the knowledge and skills to use IT to do the best possible research, scholarship, teaching, learning service and administration

1. What does digital citizen in the context of our academic mission mean to you?
2. What do you consider to be the primary parameters or processes that should be in play to direct IT investments (Institutionally and locally) to achieve this vision?
3. What are some example investments that would illustrate this kind of innovation and leadership? In general, how do we identify these?

C. IT Innovation

We have a vision statement that says that we want to be recognized as an institution that is an innovator and leader in applying IT to advance its academic mission.

1. What do innovator and leader in applying IT to advance our academic mission mean to you?
2. What mechanisms could be used to encourage and support innovation?
3. How should we view innovation vs. risk?

D. IT Innovation

We have a vision statement that says that we want to be recognized as an institution that is an innovator and leader in applying IT to advance its academic mission.

1. What do innovator and leader in applying IT to advance our academic mission mean to you?
2. How can UCLA institutionally draw upon its capacity for innovation to develop institutional capability?
3. How will we know that this IT Principle is being implemented and UCLA is improving its leadership in this area?
